INDEX

A

Acid-base regulation, 108
A competitive inhibition test for diagnosis of schistomiasis using monoclonal antibodies, 393
Actinian-asteroid interactions, 188
Activation of starfish eggs, 465
Adaptive significance of semilunar cycles of larval release in fiddler crabs (genus *Uca*): test of an hypothesis, 251
ADELMAN, W. J., JR., A. J. HODGE, AND R. B. WALTZ, Trigonometric nearest neighbor analysis of the neuroplasmic lattice arrays in axons, 379
ADELMAN, W. J., JR., see E. F. Stanley, 403
A gill disease of *Limulus polyphemus* associated with triclad turbellarid worm infection, 392
Aggregation factor complex of *Microciona*, 378, 438
Agglutination, 438
AIGMEN, SEYMOUR, TERESA PAXHIA, BLENDA ANTONELLIS, AND WILLIAM WALDRON, Effects of H_2O_2 on the dogfish (*Mustelus canis*) ocular lens, 404
ALANTALO, PHILIP, see Carl J. Berg Jr., 397
ALBERTE, R. S., see Craig J. Anmuth, 355, Robert D. Smith, 368, and W. C. Dennison, 364
ALLEWELL, NORMA, see George Q. Daley, 357
Algal pigments, seasonal variation in flux, 363
ALKON, DANIEL L., see Joseph Farley, 383, 399
ALLEN, ROBERT D., RAYMOND J. LASEK, SUSAN P. GILBERT, ALAN J. HODGE, AND C. K. GOVIND, Fast axonal transport in lobster axons, 379
ALLEN, ROBERT D., see Anthony C. Breuer, 381, and A. J. Hodge, 384
ALLIEGRO, M., see H. Schuel, 377
A low molecular weight subunit of the aggregation factor complex of *Microciona prolifera* that stoichiometrically binds to and inhibits the intact aggregation factor, 378
Ammocoetes, see lamprey
Anatomy and fine structure of the eye in fish. IV ciliary type tissue in nine species of teleosts, The, 131
ANDERSON, CATHLEEN, ABBY M. RICH, ADAM DICKER, PHILIP DUNHAM, AND GERALD WEISSMANN, Stimulus/response coupling in sponge aggregation: evidence for calcium as an intracellular messenger, 371
An echinoderm vitellaria with a bilateral larval skeleton: evidence for the evolution of ophiuriod vitellariae from ophioplutei, 431
An endopeptidase inhibitor, similar to vertebrate α-2 macroglobulin, present in the plasma of *Limulus polyphemus*, 402
A new method for preparing marine eggs for microinjection: the "fly paper" technique, 376
ANMUTH, CRAIG J., S. M. GALLAGER, R. MANN, AND R. S. ALBERTE, Glutamate dehydrogenase activity in wood- and mud-burrowing bivalve molluscs, 355
Anoxic decomposition in marshes, 370
Antibiotics, resistance to in enteric bacteria, 362
Anti-inflammatory drug, Indomethacin, 377
ANTONELLIS, BLENDA, see Seymour Zigman, 404
An unexpectedly steep developmental gradient in *Asterias forbesi* embryos induced by anoxia, 373
A phytomastigophorean infection of embryonating sea hares *Aplysia californica*, 393
Aplysia, phytomastigophorean infection, 393
A possible role of protein carbomethylase in fertilization and sperm motility, 355
Aqueous humor, 131
ARANOW, C., J. COHN, AND W. TROLL, A possible role of protein carbomethylase in fertilization and sperm motility, 355
Arbacia, effect of gossypol on sperm ATPase, 374
  effects of enzymatic and nonenzymatic proteins on spermatozoa, 420
A relatively robust, single-trial, associative learning in the opisthobranch mollusc, *Pleurobranchaea californica*, 381
ARMSTRONG, PETER B., see James P. Quigley, 402
A single calcium-mediated process can account for both rapid and slow phases of inactivation exhibited by a single calcium conductance, 398
Associative learning in *Pleurobranchaea*, 381
Asterias, meiosis initiation in oocytes, 372
  embryos induced by anoxia, 373
  role of germinal vesicle, 374
  coelomocyte clumping, 438
  sperm aster and pronuclear development, 453
  oocyte maturation, 465
Asteroidea, 348
A study of the heat shock response in early embryos of *Spisula solidissima*, 377
Asymmetric claw muscle fiber types, 329
Asymmetry in the olfactory system of the winter flounder, *Pseudopleuronectes americanus*, 389
ATEMA, JELLE, see Dana V. Devine, 144
ATPase, effect of gossypol on, 374
AUGUSTINE, GEORGE AND ROGER ECKERT, Calcium-dependent potassium current in squid presynaptic nerve terminals, 397
AVEC-DIC analysis of membranous organelle transport, 382
Axonal transport, in lobster, 379, in isolated axoplasm of *Myxicola infundibulum*, 381
Axons, analysis of neuroplasmic lattice arrays, 379
  fast axonal transport in lobster, 379
  membranous organelle transport in squid, 382
  observations during gluteraldehyde fixation in lobster, 384

use and construction of carbon fiber electrode, 386
Axoplasm, fast axonal transport in *Myxicola*, 381
analysis of membranous organelle transport in squid, 382

B

Bacteria, numbers, diversity, and distribution, 366
halophilic, 369
germination properties, 370
clump-forming, 400
